## Baby diapers

The following raw materials are used in the production of baby diapers:

<b>Fluff</b>	ECF-bleached paper material. Does not contain optical brightener.
<b>SAP</b>	Produced from acrylic polymers, does not contain phthalates (SAP = Superabsorber).
<b>Non-woven</b>	Produced from polypropylene (PP) without the use of organic solvents. Is not based on chlorine and does not contain phthalates.
<b>Tape</b>	Produced from paper and polyethylene (PE), does not contain phthalates.
<b>Foil</b>	A laminate consisting of a layer of breathable polyethylene (PE) and a layer of nonwoven (PP), does not contain phthalates.
<b>Lycra</b>	Mainly consists of elastomers made from polyurethane.
<b>Ink</b>	The printing ink is not based on heavy-metal-containing pigments.
<b>Adhesive</b>	Does not contain phthalates or colophonium, is based on resin and wax.

**No** phthalates, organotins (MBT, DBT, TBT), heavy metals, Cl (Chlorine), HCHO (Formaldehyde), colophonium, AZO-pigments, PVC, substances known as harmful to health or the environment, known allergens, substances classified as locally irritating, sensitizing, carcinogenic or mutagenic have been added during the production of the raw material or used during production of the finished product.

**No** compounds listed on SVHC (REACH Article 33 (2)) will be present in more than 0,1%.

Baby diapers contain no perfume, odor inhibitors or lotion/moisturiser in order to avoid allergic reactions. The reason is that such lotions may contain allergising agents that have only been added to prevent odour. The absorbing material in the product is fully capable of satisfying this purpose.

The diapers have been tested dermatologically by the institute ProDERM (Institute for Applied Dermatological Reserch) and ATC GmbH (Applied Tox-Consult) with the result "Good".

Manufactured by: Abena Produktion A/S, Egelund 37, DK-6200 Aabenraa  
The production is certified according to ISO 9001 (quality), ISO 14001 (environment), OHSAS 18001 (occupational health and safety) and BRC Consumer Products, Global Standard Product Group 2 (product safety and legality).

Further information/documentation exist in the quality department of Abena Produktion A/S.

A handwritten signature in blue ink, appearing to read "Mette-Sophie Thomsen".
